Overview

This document is provided to help you better understand the Ph.D. degree program procedures and requirements of the University of Missouri Informatics Institute (MUII), as well as general information that should be useful to you as a graduate student. Included within is important information pertaining to University and program policies, financial and support services, and other vital information. **It is your responsibility to read and familiarize yourself with the material contained in this manual.**

Although every effort has been made to ensure up-to-date accuracy of the information contained within, many policies outside of this doctoral program are subject to change without notice. Information contained in this manual should be considered supplementary to existing University policies and is subject to supersession at any time by any and all applicable rules, regulations, and policies outlined by the University System, MU Office of Graduate Studies, and the sponsoring academic units, where and/or when applicable.

If you believe this document contains any errors or inaccuracies, please notify MUII staff.

Model Timeline

Health Informatics	✓	✓	✓	✓	15 hours	1 hour/sem	2 hours/2 rotations		✓
Geoinformatics	✓	✓	✓	✓	15 hours	1 hour/sem	2 hours/2 rotations		
Future Informatics areas	✓	✓	✓	✓	15 hours	1 hour/sem	2 hours/2 rotations		

*The current list of allowed area and methods courses is online at http://muii.missouri.edu/current_students/program_of_study.php

Students are required to take 1 additional methods course beyond INFOINST 8810 and STAT 7510, as well as 15 hours of area courses. Courses approved as area courses in the semester of a student's enrollment will be valid for fulfilling this requirement regardless of subsequent changes to the area course list. Courses added to the area course list after enrollment will also be deemed acceptable.

Students will file the D-2 form outlining their planned courses at the time of the qualifying exam:

<http://gradstudies.missouri.edu/forms-downloads/repository/d2.pdf>

Pre-Qualifying Exam - Phase 1

Advisor

Selecting an Advisor

Students may select an advisor prior to joining the program. If they do not do so, the advisor must be selected after the last of the two required lab rotations. At that time, the student should communicate with the rotation advisors with whom he or she is interested in performing his or her dissertation research, and if the faculty member is mutually interested,

appoint that individual as advisor. The final selection shall be communicated to the Director of Graduate Studies by the end of the final rotation, so that the decision can be communicated to the appropriate fiscal officer.

If the graduate student should fail to find an advisor after three rotations, the Graduate Program Committee may place the student on probation depending on the rotation evaluations and allow the student to perform additional rotations to facilitate the student finding an advisor. If the student fails to find an advisor after additional lab rotations, the Graduate Program Committee may either allow the student to withdraw from the program or dismiss the student from the program following the procedures in the [Graduate Student catalog](#).

Responsibilities of the Advisor

- Impartially and constructively evaluate student performance.
- Acknowledge any student contributions to research and/or creative activity, as appropriate, when the results of such activities are presented at conferences, in professional publications, or in applications for copyrights and patents.
- Have a clear understanding with graduate students about their specific responsibilities regarding academic, creative activity, and/or research activities responsibilities, including time lines for completion of comprehensive examinations, research, and the thesis or dissertation, as applicable.
- Discuss the laboratory's authorship policy with graduate students in advance of entering into collaborative projects.
- Perform all of the responsibilities above without regard to religion, race, gender, sexual orientation, nationality, or other criteria that are not germane to the execution of those responsibilities.

[\(Guidelines for Good Practice in Graduate Education\)](#)

Change of Advisor

If a student decides that he or she no longer wishes to work with an advisor, he or she may request of the DGS to find another advisor in the program. Upon this request, the DGS will meet with the advisee and advisor separately, and solicit input from the student's doctoral committee when possible. If the student is making satisfactory progress, the Graduate Program Committee will aid the student's search for a new advisor in the program who can financially support the student. If the search for a new advisor fails, the student will either be dismissed from the program or be allowed to withdraw from the program. Alternatively, if the student is not making satisfactory progress, the Graduate Program Committee may dismiss the student from the program.

If an advisor chooses no longer to advise a student, the Director of Graduate Studies will meet with both the advisor and advisee separately, as well as solicit input from the student's doctoral committee. If the student is making satisfactory progress, the DGS will help the student find another advisor within the program who can financially support the student. If

the search for a new advisor fails, the student will either be dismissed from the program following the procedures in the Graduate Student catalog or be allowed to withdraw from the program. Alternatively, if the student is not making satisfactory progress, the Graduate Program Committee may dismiss the student from the program, following the procedures in the Graduate Student catalog.

[\(Guidelines for Termination, Dismissal, Extensions, and Appeals\)](#)

Advisor Retires or Leaves MU

In the event that an advisor retires or leaves MU, he/she may continue to serve as a student's advisor. If an advisor is unable to continue to serve, the Director of Graduate Studies will assist the student in finding another advisor in the program who can financially support the student, providing the student is making satisfactory progress. If an advisor who is either retiring or leaving the University is unwilling to continue to serve, see second paragraph of Advisor-Advisee Dissolution.

Committee

Formation of the Doctoral Committee

The Doctoral committee has primary responsibility for (1) approval of the student's course of study, (2) administration of the individual student comprehensive exam and (3) critical review and approval of the student dissertation project.

Responsibilities of the Doctoral Committee

The Doctoral committee will meet regularly (see timetable below) with the student to evaluate progress toward the graduate education requirements and will produce a formal annual report to program describing this progress.

Students are strongly encouraged to meet with their dissertation committees at least annually– and preferably more frequently. For more details regarding forming a doctoral dissertation committee, please refer to the [Office of Graduate Studies website](#).

Forming a Doctoral Committee

Each student, with advice from his/her mentor and the Director of Graduate Studies, will assemble a Doctoral committee (dissertation committee) composed of at least four members. Prior to taking the QE, the student should select an advisor and form a dissertation committee. The Committee will consist of the MUII student's advisor as committee chair, and at least three (3) other faculty members, one to be from outside the home department of the advisor. The advisor and two (2) other committee members must be in the MUII Core Faculty

body (see Core Faculty listing at the [MUll website](#)). The outside committee member should be faculty from an experiential area closely related to the student's research project, such as a plant researcher for bioinformatics students working on plant genomics, or a radiologist for health informatics students working on imaging informatics. The Chairperson of this committee need not be the student's advisor. Membership requirements for the dissertation committee are listed on the [Office of Graduate Studies website](#).

Changing Doctoral Committee Members

In the event of a change of committee member during a student's degree program, the Director of Graduate Studies and the Graduate Program Committee must approve the changes. A [Change of Committee form](#) is then submitted to the Office of Graduate Studies for approval.

Lab Rotations

Purpose

The purpose of the experiential learning and lab rotation activities is to acquaint students with on-going informatics research by having them spend time working with an existing researcher or research group. Experiential learning activities and lab rotations will expose students to various research data collection procedures, analysis and need for medical and biological research, particularly involving communication and dialogue skills with non-informatics collaborators. MUll affiliate faculty will solicit potential projects and forward the information to the MUll office at least two weeks before semester starts.

All MUll students are required to rotate through two different experiential learning or lab rotations in the first three semesters of enrollment in the PhD program. The student and the Director of Graduate Studies shall meet prior to each rotation to determine the appropriate laboratory and rotation advisor. The rotation advisor selected must concur in this decision. Students may elect to have two additional rotations if desired during the second year. The DGS will consult with student's advisor, if any, for the assignment of the project. The principal investigator (PI) of the experiential learning site or the lab will collaborate on the expectations and rotation duties using the [MUll Rotation Form](#) prior to the actual rotation. If safety or other necessary training is needed, it has to be addressed in the form. Experiential learning and/or lab rotations, INFO INST 8088, are graded on an S/U (pass/fail) basis by the DGS based on the evaluation provided by the PI of the experiential learning site or the lab. The students who take INFO INST 8088 should present at the MUll seminar to share their rotation experiences with the students and faculty before the final week of the semester.

Rotation form - https://muii.missouri.edu/forms/lab_rotation/edit.php

Yearly Progress Reports

During the first year of study, satisfactory progress will be defined as passing grades in coursework and satisfactory rotation evaluations, culminating in the student finding a funded advisor for his or her doctoral research. Subsequently, it will be defined as successful completion of academic coursework and the comprehensive examination, as well as continued research progress toward the student's degree as judged by the advisor and the student's doctoral committee, and usually culminating in publication(s) in refereed journals and continued grant funding for the project. *Students will not be permitted to progress through the next degree phase (qualifying exam, comprehensive exam or dissertation defense) until the Institute has received the current year's report.*

Advisor's report: The advisor will be electronically notified after a student submits her or his report and will have the opportunity to file a written response.

Qualifying Exam

The qualifying examination (QE) is committee-based. The student is expected to take the QE by the end of the third academic semester. The student must provide the completed request form (see Appendix 3) to the MUJI office at MUJIGraduateProgram@missouri.edu to schedule the QE at least two weeks prior to the planned examination date. The advisor will work with committee members and MUJI office to schedule the examination date. **The request form must have the following parts: (1) summary of course work and a draft of D-2 form (Doctoral Plan of Study), and (2) a 1-page research statement.** The MUJI office will forward the approved application to the advisor, the DGS, and committee members within three business days after submission.

Coursework: The committee will obtain comments from course instructor(s) and evaluate the quality of coursework based on grades received and instructor's comments.

Oral examination: The committee will prepare QE questions based on the 1-page research statement submitted by the student. The scope of the questions may be directly or indirectly related to the topics listed in the statement. This examination is intended to evaluate breadth and depth of the understanding the student has of fundamental informatics problems and potential solutions. The length of the exam shall not exceed two hours, and is closed to the public.

Outcomes: The student will receive one of the following three possible results for the QE immediately following completion of the examination: pass, conditional pass, or fail. If the student fails the exam twice, the student will be dismissed from the program.

Outcome 1 - Pass: The student and MUJI office (MUJIGraduateProgram@missouri.edu) will receive a written report by the committee, addressing the committee's concerns, if any, and an explanation of identified strengths and/or weaknesses of the answers expressed within one week of completion of the QE. Upon successfully passing the QE, the advisor must

submit the Qualifying Examination Results and Doctoral Committee Approval Form ([D-1 Form](#)) to MUII within one week of the examination date. The student and advisor will receive a confirmation e-mail from MUII when the form has been submitted to the Office of Graduate Studies.

Outcome 2 - Conditional Pass: The committee has concerns, but believes the student can overcome the reasons for the concerns through one or more of the following activities: by reading additional papers/books, taking additional courses, and/or other actions identified by the committee for further improvement. A written report with clear action and assessment plans for the student will be sent to the student and MUII office (MUIIGraduateProgram@missouri.edu) within one week following the QE. The student must fulfill the requirements according to the action plan provided by the committee within the timeframe specified in the action plan to remain in good standing.

Outcome 3 - Failed: The student did not meet the committee's minimal standard regarding qualifications to undertake studies at the Ph.D. level. A written report with clear action and assessment plans for the student will be sent to the student and MUII office (MUIIGraduateProgram@missouri.edu) within one week following the QE. The student will have one opportunity to retake the examination, and this retake must be within six months of the original examination date.

If the student cannot meet the timelines for Outcomes 2 or 3, the student will need to seek an exception in writing. Exceptions will only be made for catastrophic personal circumstances. The [Graduate Program Committee](#) will be the final arbiter of the exception. Although the student's advisor will be consulted in making this decision, the advisor will not be allowed to submit a letter on behalf of the student. This places the burden for managing the exception on the student.

Plan of Study (D-2) should be reviewed during the QE process and submitted no later than one (1) month after the QE passing date. The student must substantially complete the course work outlined in the Plan of Study to the satisfaction of the doctoral program committee and the Office of Graduate Studies before being declared ready for the comprehensive examination.

Pre-comprehensive exam phase - Phase 2

Comprehensive Exam

A doctoral student must successfully complete the comprehensive examination within a period of five years, beginning with the first semester of enrollment as a Ph.D. student. The MUII Comprehensive Examination (CE) is a two-stage process, which includes a research proposal submission (written portion in R01 format) and an oral CE.

Request

To begin the CE process, students must submit a Comprehensive Exam Request form, along with the written proposal and required publications (see below). The advisor will work with the committee and MUII office to finalize the examination date. The Institute will forward the proposal to the dissertation committee within two business days and schedule an examination date no sooner than 4 weeks and no later than 6 weeks. The student, advisor, and committee members will receive a confirmation e-mail from MUII office upon finalization of the examination date.

Publication requirement

To schedule the comprehensive exam, the student must provide with the Comprehensive Exam Request Form either a) a PDF copy of a published, first or joint-first authored, manuscript in a peer-reviewed journal or conference or b) PDF copies of two or more co-authored published peer-reviewed journal or conference publications or c) A first or joint-first authored manuscript draft along with an email from a journal editorial office indicating that the manuscript is accepted. For publications in conference proceedings, the manuscript must be a full paper (6 or more pages). Written requests (including a clear publication plan) for exceptions to this policy will be considered on a case-by-case basis by the Graduate Program Committee.

Research Proposal

The student must follow the guidelines of an R01 proposal (<http://grants.nih.gov/grants/funding/r01.htm>) for the organization and content of the comprehensive exam proposal (i.e., summary, narratives, research plan, and references). The committee will review the proposal and decide if its quality is satisfactory. If the proposal is deemed satisfactory with no more than one dissenting vote, the student will receive written feedback from the committee within two weeks after receiving the CE confirmation e-mail from MUII. If the proposal is deemed unsatisfactory, the student and MUII office will receive written notification of the concerns of the committee from the advisor. If unsatisfactory, the student must submit a revised proposal no sooner than 12 weeks after receiving the written notification. A student may only resubmit one time. Failing a second time will result in dismissal from the program.

Oral CE

The first part of the oral CE is open to the public and will be advertised by MUII. The student will provide an oral presentation on the research proposal. The student's advisor will determine the precise format of the presentation. The Dissertation Committee will ask questions related to the research proposal in general. The questions will not be limited to the feedback provided by the committee prior to the oral examination. Potential questions include, but are not limited to, the student's preliminary research results, research design,

technical approach, and the next phase of the student's research. The second part of the exam is closed to the public, with only the dissertation committee and the candidate in attendance. Immediately following the public portion of the defense, the committee and student will continue the defense in private. The full committee will then meet in closed session to vote on whether the student has passed. The entire oral CE is expected to take 2-3 hours.

There are two possible outcomes from the CE.

- (1) If the committee determines that the examination is satisfactory, with no more than one dissenting vote, the advisor (dissertation committee chair) will submit the [Doctoral Comprehensive Examination Results \(D3\)](#) form to the DGS, who will then submit it to the MUJI office in advance of the one month Office of Graduate Studies deadline.
- (2) If the examination is unsatisfactory, the committee, in consultation with the DGS, will provide a written report to the student indicating key issues identified, provide advice for addressing the issues, and set a timeframe for retaking the oral examination. The student must wait at least 12 weeks before retaking the oral exam. Failing the CE a second time will result in dismissal from the program.

Students who pass the CE will enter into their doctoral candidacy, and should register for INFO INST 9090 for all future research hours.

Dissertation Defense - Phase 3

Scheduling

To schedule the dissertation defense, the student must submit the Dissertation Defense Request Form along with the required publication information (see below). The doctoral dissertation defense must be scheduled no sooner than seven months after successful completion of the CE

(<http://gradschool.missouri.edu/policies/doctoral/requirements/dissertation.php>).

The dissertation itself must be written on an informatic subject approved by the candidate's doctoral program committee, must embody the results of original and significant investigation, and must be the candidate's own work.

Publication requirement

To schedule a dissertation defense, the student must provide with the Dissertation Defense Request Form both a) a PDF copy of a published, first or joint-first authored, manuscript in a peer-reviewed journal or conference and b) either another paper fulfilling the above requirement, another accepted paper (along with editorial acceptance letter) or a manuscript along with a submission receipt to a peer-reviewed conference proceeding or journal. For submissions and publications in conference proceedings, the manuscript must be a full paper (6 or more pages). Written requests (including a clear publication plan) for exceptions

to this policy will be considered on a case-by-case basis by the Graduate Program Committee.

Dissertation

Students are encouraged to actively communicate with the dissertation committee while they are working on their dissertations. The dissertation defense process begins when the candidate submits a draft of the dissertation with the consent of the advisor and an official e-mail request to the Institute MUIGraduateProgram@missouri.edu. The advisor will work with committee members and the MUII office to schedule the examination date. The Institute will electronically forward the dissertation draft to the committee within two business days and advertise a defense date, that is at least two weeks from the date the committee receives the electronic dissertation draft. The student will supply a paper copy to those committee members who request a copy. The candidate must be enrolled to defend the dissertation, which can only be defended when MU is officially in session (<http://gradstudies.missouri.edu/admissions/types-of-enrollment/doctoral-candidacy.php>).

Dissertation Defense

The examination consists two parts - one part open to the public and one part closed. The entire defense is expected to be 2-3 hours.

- (1) The open section of the defense will be an oral presentation to the public audience by the candidate with a question and answer period following. The student advisor will determine the precise format of the presentation.
- (2) The second part of the exam is closed to the public, with only the dissertation committee and the candidate in attendance. Immediately following the public portion of the defense, the committee and student will continue the defense in private. The full committee will then meet in closed session to vote on whether the student has passed.

For the dissertation to be successfully defended, the student's doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote. Failure of the dissertation defense will result in dismissal from the program.

Once the defense is completed satisfactorily, the committee chair will submit results (the D-4 form) to the MUII office. The MUII office will then submit the D-4 form to the Office of Graduate Studies (<http://gradstudies.missouri.edu/forms-downloads/repository/d4.pdf>). The candidate will revise the dissertation draft based on the committee's feedback before submission to the Office of Graduate Studies.

MUII Policies

Academic Probation & Dismissal

At the end of each semester, graduate students with a cumulative GPA below 3.0 are placed on probation. If at the end of the following semester the cumulative GPA is 3.0 or better, the probationary status is removed. A student on probation failing to raise the cumulative GPA to 3.0 may be allowed a second probationary semester. A student is subject to dismissal upon failure to raise the cumulative GPA to 3.0 by the end of the second probationary semester, or at any time a semester/term or cumulative GPA falls below 2.0. In addition, an advisor may recommend, with the agreement of the Director of Graduate Studies, to place a student on probation for failure to make adequate degree progress.

Note: Summer session is not counted as a semester. (Graduate Catalog, <http://gradschool.missouri.edu/policies/progress/probation-dismissal.php>)

Extensions

When there has been unsatisfactory progress with respect to meeting university-wide Office of Graduate Studies time to degree limits, the student may file a written request for an extension with the Vice Provost for Advanced Studies and Dean of the Office of Graduate Studies who will grant or deny the request. The Director of Graduate Studies and the student's major advisor must endorse the extension. If an extension is granted, the student will be given a specified period of time to correct the deficiency. Denial of an extension request is final and binding. Please contact the Office of Graduate Studies for more information. (Graduate Catalog, <http://gradstudies.missouri.edu/academics/progress/probation-termination.php>)

Appealing a Dismissal

If the student decides to appeal the program dismissal, the appeal process will take effect through the same committees as the original decision; a letter from the student to the Director of Graduate Studies for the program will initiate the process. As long as a student is in an appeal process, the student should maintain enrollment and continue working on degree program requirements. Students must complete the program appeal process prior to considering an appeal to the Graduate Faculty Senate. If the student does not appeal the program's dismissal, the Office of Graduate Studies will send the student an official notice of dismissal from the program. (Graduate Catalog, <http://gradstudies.missouri.edu/academics/progress/probation-termination.php>)

Leave of Absence

It will be the responsibility of the student to resolve all issues pertaining to their support (e.g., GRA, GTA, Fellowship or Scholarship) with their advisor or other relevant authority prior to taking an approved leave of absence. These issues include the date when support will be terminated and whether or under what conditions the student will be reinstated for support upon their return. Prior to the completion of the Leave of Absence, the student must notify the program's Director of Graduate Studies (DGS) and the Office of Graduate Studies so that the reentry process can be initiated.

A graduate assistant unable to fulfill the duties of his or her appointment because of illness or injury shall notify the administrator of his or her major unit as soon as circumstances permit. Similarly, a graduate assistant unable to fulfill the duties of her or his appointment because of birth or adoption of a child shall notify the administrator of her or his major unit as soon as circumstances permit. The appointing unit may adjust the graduate assistant's workload duties as the assistant's physical circumstances reasonably dictate. If total absence from duties becomes necessary, the major unit shall hold the appointment, provided the graduate assistant is still enrolled, for a period of two months, or to the end of the appointment period or of the semester, whichever should occur first. The graduate assistant shall have the right to return to the assistantship, within the original terms of the appointment, at such time as he or she is able to reassume the duties of the position. (Graduate Catalog, <http://gradstudies.missouri.edu/financials/assistantships-fellowships/leaves-of-absence.php>).

Academic Integrity

[The](#) Office of Student Rights & Responsibilities¹ states:

Academic integrity is the core set of values and principles that underwrites the very mission of the University itself: integrity, honesty, hard work, and the determination to translate personal and professional principles into behavior. It is a reflection of the students' experience here at Mizzou and is a measure of the very worth of their degree.

- For students, this ethic lies at the heart of the value of their degree. If they, or others around them, are not living up to a high standard of academic integrity, the worth of the education they are receiving (and the degree they will receive) is compromised.
- For faculty, a high standard of academic integrity will ultimately lead to greater heights of academic rigor and freedom among students, a better reputation for MU, and more positive patterns of interaction with the student population. We can generate a long-

¹ <http://osrr.missouri.edu/about/index.html>

lasting academic focus among the faculty population that migrates to MU and the student population that passes through Mizzou.

Article VI of the Faculty handbook² states:

Academic dishonesty refers to any act that is intended to produce an academic assessment that is not commensurate with an individual's performance, or any act that is intended to unfairly assist or hinder an individual's academic efforts. Such acts include, but are not limited to, the following:

- Allowing the work of one person to be academically assessed as the work of another.
- Allowing academic credit to be assigned to work that was not performed.
- Unauthorized possession of resources (e.g., reserved library material, laboratory material, art work, computer software, or medical excuses).
- Misrepresentation of an academic record (e.g., changing grades, failure to report work done at other institutions).
- Denial of access to resources (e.g., reserved library material, laboratory material, art work, computer software) intended to be available to others.

All University System rules and regulations, including more information about academic honesty, can be found at the [UM System's web site](#).

Academic Honesty at MUII

MUII is committed to the highest standards of academic and professional ethics, including academic honesty. MUII students are expected to adhere to standards outlined by the University System. A charge of academic dishonesty is serious and can have serious consequences if guilt is established. Discipline ranges from a warning to expulsion from the University, and students may receive a failing grade for the course or assignment in question.

<http://teachandlearn.missouri.edu/guide/chapters/academicintegrity.htm> - top

Student Resources

Travel funds

Students are encouraged to apply for travel funds through the Office of Graduate Studies programs and student travel grants/awards by professional conferences prior to asking for travel support from MUII. Budget permitting, MUII students in good standing are eligible to apply travel assistance. Students presenting podium presentations may receive up to \$1,200 per academic year; students presenting poster presentations are eligible for up to \$700 in travel funds per academic year. For additional funding, students should request assistance

² <http://facultycouncil.missouri.edu/handbook/article-6.html>

from their advisors. For further information regarding student funding, please visit the MUII website.

Students awarded travel funds must:

1. Have a peer-reviewed presentation at informatics-related conferences.
2. Promote MUII by referencing MUII's affiliation on the publication. The official wording should be "University of Missouri Informatics Institute."

Students have to submit the MUII Student Travel Authorization Form (Appendix 5) at least three weeks before the deadline for early registration. To receive reimbursement for MUII travel, all receipts to MUII office must be submitted no later than two week after travel.

Resources and Facilities

MUII can be found in multiple locations on the MU campus - Engineering Building West, the Clinical Support & Education Building, and the Christopher S. Bond Life Sciences Center, all of which have well-equipped laboratories containing state-of-the-art instrumentation and computing facilities for informatics research. Major instrumentation includes a Dell EM64T cluster system with 512 processors, an SGI Altix BX2 SMP server with 64 Itanium2 processors, and a number of DELL servers with multiple quad-core processors for computational research.

All MUII students are assigned Unix shell accounts on **lindberg.muii.missouri.edu** for their informatics course work and personal website hosting. Up-to-date forms listed in this handbook can be downloaded through the Institute's website at <https://muii.missouri.edu/serverForm.php>. MUII is participating in Microsoft Developers Network Academic Alliance (MSDNAA) also known as DreamSpark. All students have access to free Microsoft software at <https://muii.missouri.edu/msdnaa/>

MUII has a variety of computing equipment, laboratories, and clinical settings available for instruction and research. These facilities, enhanced in conjunction with computing laboratories maintained by the campus, offer MUII students a wealth of opportunity to access and utilize a wide range of research settings best suited for their instructional and research needs. All of the computer equipment is connected to departmental, campus and global networks, which provides ready access to the exploding world of information and computational resources. Institute information can be obtained by accessing the MUII website at <http://muii.missouri.edu>.

Library resources are available through extensive collections of books and journals housed in Ellis Library, as well as collections in the Engineering and Mathematical Sciences and Health Sciences Libraries at MU. The entire library catalog at MU (all library branches), as well as the

other campuses of the University of Missouri System, are available online, and can be searched from any computer access point at the university.

Administrative Office

The MU Informatics Institute director and administrative offices are located in room 241 Engineering Building West. The administrative office is open Monday through Friday from 8:00 a.m. - 5:00 p.m.

Mail

Official University business mail will be delivered to students' assigned mailboxes in Engineering Building West, Life Sciences Building, the Clinical Support and Education Building, or other campus locations where student's advisor's research group is located. Please do not arrange for personal mail to be sent to your campus address.

Telephones

When dialing an MU phone number using a campus phone, dial the last five digits of the number you are trying to reach. For example, if you are trying to reach the MUII office at 882-9007, dial "29007" to be connected. To reach university numbers that begin with 771, dial all seven numbers.

To make local, off-campus phone calls, first dial "9", followed by the seven-digit phone number you are trying to reach. Long distance phone calls must be placed by MUII staff or faculty and calls must be for university business.

Photocopies

Photocopy machines in Engineering Building West 241 and in Clinical Support and Education Building CE727 are provided for copying class-related materials only, and personal items may not be copied. The copiers require an access code for use; to obtain a code, see MUII staff.
